

No-Gi Product

The fabric used on rashguard is 210gsm, 85% rpet polyester, 15%spandex

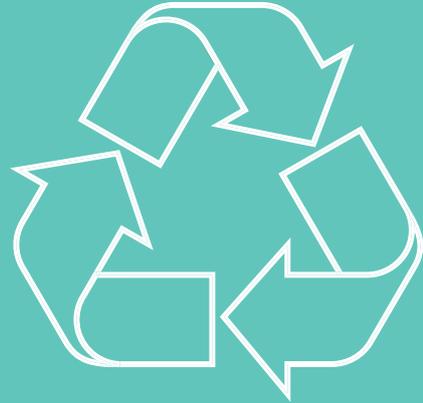

Product Labelling

The hang label is made of rpet material, frosted

Shipping & Packaging

The polybag will use biodegradable plastic, and other cardboards is recyclable.

RASH GUARDS

85% RPET POLYESTER 15% SPANDEX

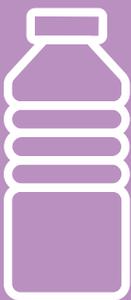

What is RPET?

Recycled PET Fabric (RPET) is a new type of green, eco-friendly fabric made from yarn of recycled PET bottles. A ton of regenerated RPET yarn equals to 67,000 plastic bottles, a reduction of 4.2 tonnes of CO2, a saving of 0.0364 ton of petroleum or a saving of 6.2 tonnes of water. It goes without saying that the increased use of RPET could have a great impact on the environment.
